To: "Karthik Venkataraman (CONT)" <Karthik.Venkataraman@capitalone.com>

I have had the pleasure to work with Karthik on several projects this year and he consistently delivers above and beyond expectations.  First and foremost, Karthik is an exceptional talent.

Karthik is a lead engineer within both the Cloud Process Improvement Engineering programme and UK Cloud Operations.  He has developed a number of innovative solutions that have had widespread adoption within the UK Tech organisation and gained interest from our US counterparts.  Examples of these are the DynamoDB snapshot replication workflow, dockerised pipelines, RDS backup improvements, S3 cross region replication monitoring, IAM workflow improvements and Python3 upgrades to name just a few.

Karthik has had a widespread impact on driving the CapitalOne cloud agenda.  He is regularly sought for his breadth of knowledge and cloud technical expertise.  There have been countless examples of Karthik coaching and mentoring others within UK tech.  I personally value Karthik's opinion and ideas greatly.

His work ethic is way beyond expectation.  I am yet to see any technical obstacles daunt him. He constantly embraces challenges with both enthusiasm and purpose even when the remit is undefined.

One of his stand-out achievements for this year has to be the IAM remediation work as part of an enterprise led programme named CETP (Cyber Event Technical Programme).  The technical challenges were vast, involved a considerable amount of datasets/complexities with an aggressive timescale.  Karthiks creativity and engineering acumen have been exceptional.

I'd like to take this opportunity to thank Karthik for his efforts this year.  I've really enjoyed working with him and look forward to further collaborations next year.

Regards
